

Maths at Mickleover Primary School

Understanding the written calculation
methods used for teaching addition
and subtraction from FS through to
Year 6

The aim of this workshop today is to share the calculation methods we use at Mickleover Primary School, so that you are confident in supporting your child at home.

The Maths National Curriculum

Children should:

- Become **fluent** in the fundamentals of mathematics, through varied and frequent practice with increasingly complex problems over time, so that pupils develop conceptual understanding and the ability to recall and apply knowledge rapidly and accurately.
- **Reason mathematically** by following a line of enquiry, conjecturing relationships and generalisations and developing an argument, justification or proof using mathematical language.
- **Solve problems** by applying their mathematics to a variety of problems with increasing sophistication, including breaking down problems into a series of simpler steps and persevering in seeking solutions.

At Mickleover Primary, we recognise the importance of a common and progressive approach to the introduction of standard written methods, to ensure that children have secure calculation skills that are appropriate to their understanding of number.

As pupils progress in their maths, they become ready to handle more formal written methods that in many cases increase efficiency. However, pupils are not be moved onto these methods before their conceptual understanding of each operation is sound.

Although the focus of this school policy is on pencil and paper procedures, it is important to recognise that the ability to calculate mentally lies at the heart of numeracy. Mental calculation should be seen as complementary to written recordings, as in every written method there is an element of mental processing.

Concrete apparatus is be used throughout the school to scaffold and support the learning of written methods.

- Each child has a maths track, from which are selected their maths targets.

It is these targets that underpin the progress that children make with written calculations.

Maths Target Track

Name: _____

START

Say the numbers in order to 10

Count a set of objects up to 5

Recognise numerals 1-5 (out of sequence)

Say the numbers 0-20

Count a set of objects up to 20

Recognise numerals 0-10 (out of sequence)

Say 1 more than any number between 0-10

Say 1 less than any number between 0-10

Recognise numerals 0-20

Know by heart all number bonds that total 20

Know by heart all bonds of multiples of 10 up to 100

Know by heart all doubles to 20 (double 20 = 40)

Know by heart all halves of numbers to 20 (half of 20 = 10)

Know by heart all \times and \div facts for 2 (up to 12×2)

Know by heart all \times and \div facts for 10 (up to 12×10)

Know by heart all \times and \div facts for 5 (up to 12×5)

Know all sums and differences of multiples of 10 up to 100

Know by heart all number bonds that total 100

Name: _____

Keep going!

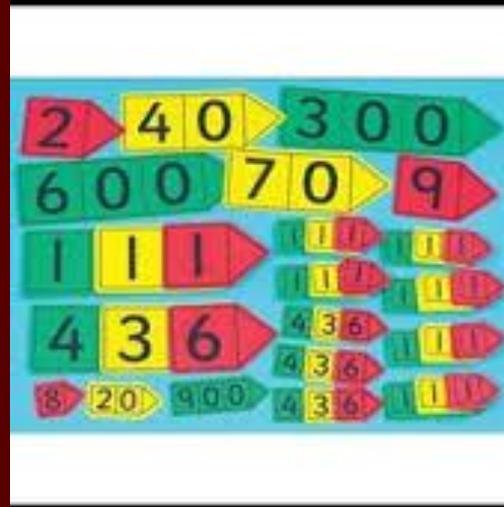

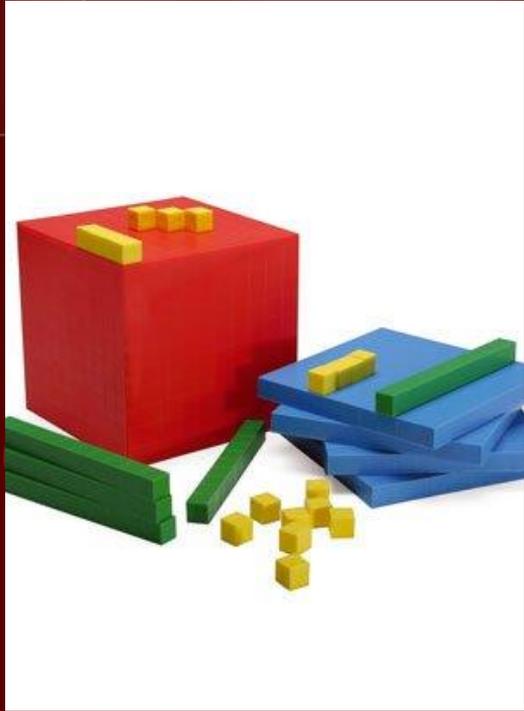

| | | |
|--|---|---|
| | | |
| Double any digit with up to 1 decimal place | | |
| Halve any digit with up to 1 decimal place | | |
| Recall quickly x facts to 12x 12 | | |
| Use multiplication facts to x pairs of multiples of 10 and 100 e.g. 30 x 70 / 40 x 200 | | |
| Know the factors of all timetable answers up to 12 x 12 | | |
| Know by heart all the squares of numbers between 1 and 12 | | |
| Know by heart all squares of multiples of 10 | | |
| Recognise and recall factors of numbers up to 100 and | | |
| | + | Relate fractions to their decimal representations 0.5 0.25 0.75 0.2 0.3 r $\frac{1}{2}$ $\frac{1}{4}$ $\frac{3}{4}$ 1/5 1/3 |
| | | Find 50% 25% 10% 5% and 1% of a given number (up to 1000) |
| | | Know equivalent fractions, decimals and percentages for all quarters, tenths, fifths and eighths |
| | | Order different fractions by changing them to decimals |
| | | Know timetable facts up to 20 x 20 using knowledge of times tables (4 x 17 = 4 x 10+4 x 7) |
| | | Recognise and use cubed numbers |
| | | Round any number up to 1 000 000 to the nearest 10, 100, 1000, 10 000 and 100 000 |

When our children leave Mickleover Primary School we expect them to be able to add and subtract large numbers using the standard written algorithm. In order to achieve this they need a secure understanding of the column methods. We achieve this through a progression of concrete, pictorial and abstract experience, from the foundation stage up to year 6.

$$\begin{array}{r} 8 \cancel{9} 4 8 \\ - 2 6 3 \\ \hline 6 8 5 \end{array}$$

$$\begin{array}{r} 3 4 2 \\ + 7 7 \\ \hline 4 1 9 \\ \hline 1 \end{array}$$

How do we
achieve
this?

Number Sense!

Children need to understand our number system, starting with counting numbers, building an understanding of how our numbers work and fit together. This includes exploring place value and comparing and ordering numbers then applying this understanding in different contexts.

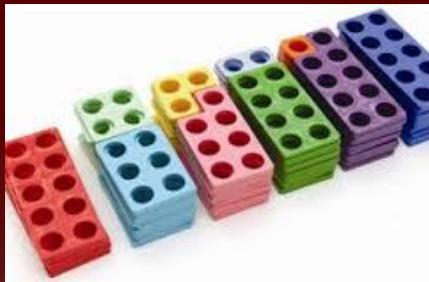

Recalling facts

- It is important that children recognise number bonds, different pairs of numbers with the same total.

10

$7 + 3$

$6 + 4$

6

$3 + 3$

8

$6 + 2$

$5 + 3$

9

$5 + 4$

$6 + 3$

7

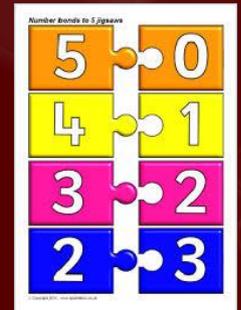

$6 + 1$

$3 + 4$

$3 + 2$

5

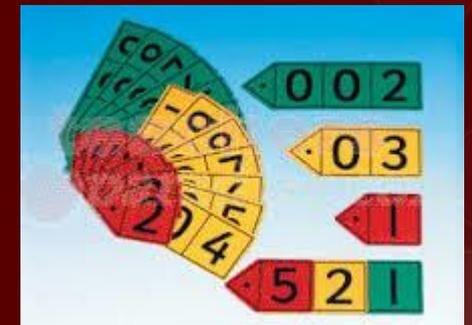

$1 + 4$

Place Value

- Place value is at the heart of the number system. All digits have a value and a secure understanding of this will enable children to use and understand different calculation methods.

Progression in written addition methods

Foundation 2

Children find the total of objects in 2 groups by counting all of them.

- Through practical activities, using fingers and through discussion they will begin to use the vocabulary involved in addition.

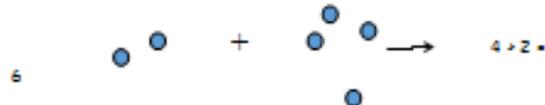

You have five apples and I have two apples. How many apples altogether?

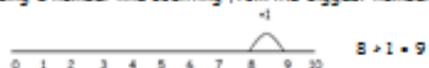

- They will record pictorially then numerically $5 + 2 = 7$ apples

Children add 2 single digit numbers by counting on.

- Through practical activities, children to begin counting on, starting from the highest number.

- Using a number line counting from the biggest number.

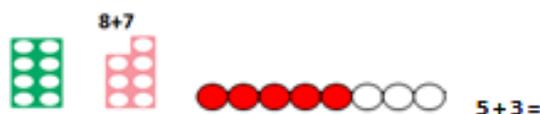

Children will find one more than a given number.

- Through songs, rhymes and practical activities children develop a sense of number.
- Children will use number line to find one more than a given number.

Year 1

Children, read, write and interpret mathematical statements involving addition (+) and the equals (=).

- Through practical activities, using rods, cubes, numicon, number beads, number lines and 100 squares.

Children add one- digit and two-digit numbers within 20, including zero

- Using practical equipment children combine groups, counting from the largest.
- Using a number line to add two numbers together, encouraging children to start from the largest number.
- using number bonds and related addition facts within 20 which have been learned.
- Using a 100 square to add in steps of 1 or 10.

12 13 14 15 $13 + 2 = 15$

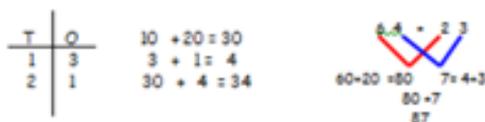

Children solve missing number problems by counting on from the given number. eg $10 + \square = 16$

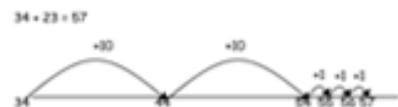

Year 2

Children solve problems with addition using concrete objects and pictorial representations. Children will learn to add :-

- A two digit number and ones
 - A two digit number and tens
 - Two two-digit numbers
 - Three one-digit numbers
- Using place value knowledge children combine Tens and Ones to add.

- Using an empty number line to add two-digit numbers.

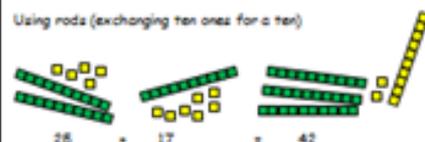

- Using Tens and Ones apparatus children add by combining groups, counting from the largest.

and apparatus children add by combining groups, where 10 ones are exchanged for a Ten.

Using rods (exchanging ten ones for a ten)

Progression in written subtraction methods

Foundation 2

Children will engage in a variety of counting songs, rhymes and practical activities to develop a sense of number.

Children will find one less than a given number.

- In practical activities, using objects and fingers they will begin to use the vocabulary involved in subtraction.

You have five apples and I eat one apple. How many apples left?

- They will record pictorially then numerically
 $5 - 1 = 4$ apples

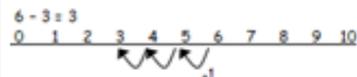

Children subtract from 2 single digit numbers, by counting back to find the answer

- Using objects then pictures, children subtract a single digit number

$$5 \text{ subtract } 3 = 2$$

- Using a number line children count back below the line to show subtraction.

Year 1

Children read, write & interpret mathematical statements involving subtraction (-) & equals (=).

- Through practical activities, using rods, cubes, Numicon, number beads, number lines and 100 squares.

$$5 - 3 = 2$$

Children subtract one-digit & two-digit numbers to 20, including zero.

- Using a number line to subtract a number, counting back below the line.

- using number bonds and related addition facts within 20 which have been learned.

- Using a 100 square to add in steps of 1 or 10.

$$12 - 2 = 10 \quad 15 - 2 = 13 \quad 66 - 20 = 46$$

Children begin to find the difference using subtraction.

Year 2

Children subtract numbers using concrete objects and pictorial representations. Children will learn to subtract -:

- A two digit number and ones
- A two digit number and tens
- Two two-digit numbers

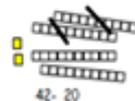

- Using knowledge of addition and subtraction families and the inverse relationship of addition and subtraction.

$$3 + 2 = 5 \quad 2 + 3 = 5 \quad \text{Number families}$$

$$5 - 2 = 3 \quad 5 - 3 = 2$$

$$48 + 36 = 84 \quad \text{so} \quad 84 - 36 = 48 \quad \text{Inverse}$$

- Using place value knowledge: children subtract Tens and Ones.

$$42 - 20$$

$$47 - 23 = 24$$

- Using Tens and Ones apparatus children subtract by removing rods where 10 ones are exchanged for a Ten.

$$42 - 27$$

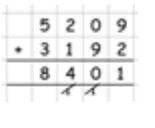

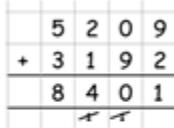

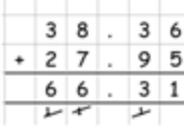

$$42 - 20$$

subtract 7 by exchanging a ten rod for 10 units

$$42 - 27 = 15$$

Progression in written addition methods

| Year 3 | Year 4 | Year 5 | Year 6 |
|--|--|---|--|
| <p>Add numbers with up to three digits, using formal written method of columnar addition</p> <p>Stage 1 no exchange and expanded</p> $\begin{array}{r} 21 \quad 20+1 \\ +17 \quad 10+7 \\ \hline 38 \quad 30+8 \end{array}$ <p>Stage 2 with exchange and expanded</p> $\begin{array}{r} 25 \quad 20+5 \\ +17 \quad 10+7 \\ \hline 42 \quad 30+12=42 \end{array}$ <p>Stage 3 begin to represent as vertical alongside expanded</p> $\begin{array}{r} 67 \quad (60+7) \\ +24 \quad (20+4) \\ \hline 91 \quad (80+11) \end{array}$ $\begin{array}{r} 67 \\ +24 \\ \hline 91 \end{array}$ <p>Stage 4 more than two numbers recorded vertically</p> $\begin{array}{r} 24 \\ 67 \\ +12 \\ \hline 13 \quad (4+7+2) \\ 90 \quad (20+60+10) \\ 103 \quad (90+13) \end{array}$ | <p>Add numbers with up to 4 digits using the formal written methods of columnar addition. Carry below the line and cross off when added into the calculation</p> $\begin{array}{r} 625 \quad 783 \\ +48 \quad +42 \\ \hline 673 \quad 825 \end{array}$   | <p>Add whole numbers with more than 4 digits, including using formal methods (columnar)</p> $\begin{array}{r} 23587 \\ +1475 \\ \hline 25062 \\ 50124 \\ \hline 121 \end{array}$  <p>Begin to add two or more decimal fractions with up to three digits and the same number of decimal places:</p>  <p>Know that decimal points should line up under each other, particularly when adding or subtracting mixed amounts, e.g. 3.2 m - 280 cm.</p> <p>When working with decimals, always make each number have the same amount of digits to the right of the decimal point</p> $\begin{array}{r} 3.70 \\ +2.35 \\ \hline 6.05 \end{array}$ | <p>There is an expectation that children will continue to practise and use the formal written method for larger numbers and decimals and use these methods when solving problems, when appropriate (see previous year's guidance for methods).</p> |
| <p>Add fractions with the same denominator within one whole</p> $\frac{5}{7} + \frac{1}{7} = \frac{6}{7}$ | <p>Add fractions of the same denominators</p> $\frac{1}{6} + \frac{4}{6} = \frac{5}{6}$ | <p>Add fractions with same denominators and multiples of the same number</p> $\frac{1}{7} + \frac{4}{7} = \frac{5}{7}$ $\frac{1}{6} + \frac{1}{6} = \frac{2}{6} = \frac{1}{3}$ | $2\frac{1}{4} + 1\frac{1}{6} = 1\frac{3}{12} + 1\frac{2}{12} = 2\frac{5}{12}$ <p>Pupils should add fractions with different denominators and mixed numbers using the concept of equivalent fractions.</p> |

Progression in written subtraction methods

| Year 3 | Year 4 | Year 5 | Year 6 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
|--|---|--|--|----------------|---|---|---|---|-------|--|--|--|---|---|---|--|---|----------------|----------------|---|----------------|----------------|---|---|---|---|---|---|-------|--|--|--|--|--|---|---|---|---|---|--|---|
| <p>Subtract numbers with up to three digits, using formal written method of columnar subtraction</p> <p>Stage 1 - expanded with no exchange</p> $\begin{array}{r} 89 = 80 + 9 \\ - 57 \\ \hline 30 + 2 = 32 \end{array}$ <p>Stage 2 - expanded with exchange</p> <p style="text-align: center;"><i>Step 1</i></p> $\begin{array}{r} 71 \\ - 46 \\ \hline \end{array} \quad \begin{array}{r} 70 + 1 \\ - 40 + 6 \\ \hline \end{array}$ <p style="text-align: right; font-size: small;">The calculation should be read as e.g. 1 minus/take/subtract 6</p> <p style="text-align: center;"><i>Step 2</i></p> $\begin{array}{r} 60 + 11 \\ - 40 + 6 \\ \hline 20 + 5 = 25 \end{array}$ <p><i>when confident</i></p> <p style="text-align: center;"><i>Step 3</i></p> $\begin{array}{r} 71 \\ - 46 \\ \hline 25 \end{array}$ $\begin{array}{r} 754 \\ - 86 \\ \hline \end{array}$ <p style="text-align: center;"><i>Step 1</i></p> $\begin{array}{r} 700 + 50 + 4 \\ - 80 + 6 \\ \hline \end{array}$ <p style="text-align: center;"><i>Step 2</i></p> $\begin{array}{r} 700 + 40 + 14 \\ - 80 + 6 \\ \hline \end{array} \quad (\text{adjust from T to U})$ <p style="text-align: center;"><i>Step 3</i></p> $\begin{array}{r} 600 + 140 + 14 \\ - 80 + 6 \\ \hline \end{array} \quad (\text{adjust from H to T})$ <p style="text-align: center;"><i>Step 4</i></p> $\begin{array}{r} 600 + 60 + 8 = 668 \\ - 80 + 6 \\ \hline \end{array}$ | <p>Subtract numbers with up to 4 digits using the formal written methods of columnar subtraction where appropriate</p> $\begin{array}{r} 6141 \\ - 754 \\ \hline 668 \end{array}$ <table border="1" style="margin-left: auto; margin-right: auto; text-align: center;"> <tr><td>5</td><td>6⁵</td><td>1²</td></tr> <tr><td>-</td><td>3</td><td>1</td><td>9</td></tr> <tr><td colspan="4"><hr/></td></tr> <tr><td>2</td><td>4</td><td>3</td><td></td></tr> </table> <p>NOTE: In both examples, we have 'exchanged' one of the six tens for ten ones. *</p> <p>Children will also begin to find the difference between two three-digit sums of money, with or without 'adjustment' from the pence to the pounds; know that decimal points should line up under each other</p> <p>£3.50- £1.67</p> <p>1.67- 0.3 1.67</p> <p style="text-align: center;">- 0.30</p> | 5 | 6 ⁵ | 1 ² | - | 3 | 1 | 9 | <hr/> | | | | 2 | 4 | 3 | | <p>Subtract whole numbers with more than 4 digits, including using formal written method (columnar subtraction)</p> <p>Use compact ('decomposition') method and the vocabulary 'exchange'</p> <table border="1" style="margin-left: auto; margin-right: auto; text-align: center;"> <tr><td>8⁷</td><td>1⁶</td><td>.</td><td>3²</td><td>1⁰</td></tr> <tr><td>-</td><td>1</td><td>9</td><td>.</td><td>0</td><td>4</td></tr> <tr><td colspan="6"><hr/></td></tr> <tr><td>6</td><td>7</td><td>.</td><td>2</td><td>6</td><td></td></tr> </table> <p>In this example, we have 'exchanged' one of the three tenths for ten hundredths</p> | 8 ⁷ | 1 ⁶ | . | 3 ² | 1 ⁰ | - | 1 | 9 | . | 0 | 4 | <hr/> | | | | | | 6 | 7 | . | 2 | 6 | | <p style="text-align: center;">As per Year 5</p> |

Column methods

- Children with a secure understanding of place value will better understand the column method for addition and subtraction.

$$\begin{array}{r} 342 \\ + 77 \\ \hline 419 \\ \hline 1 \end{array}$$

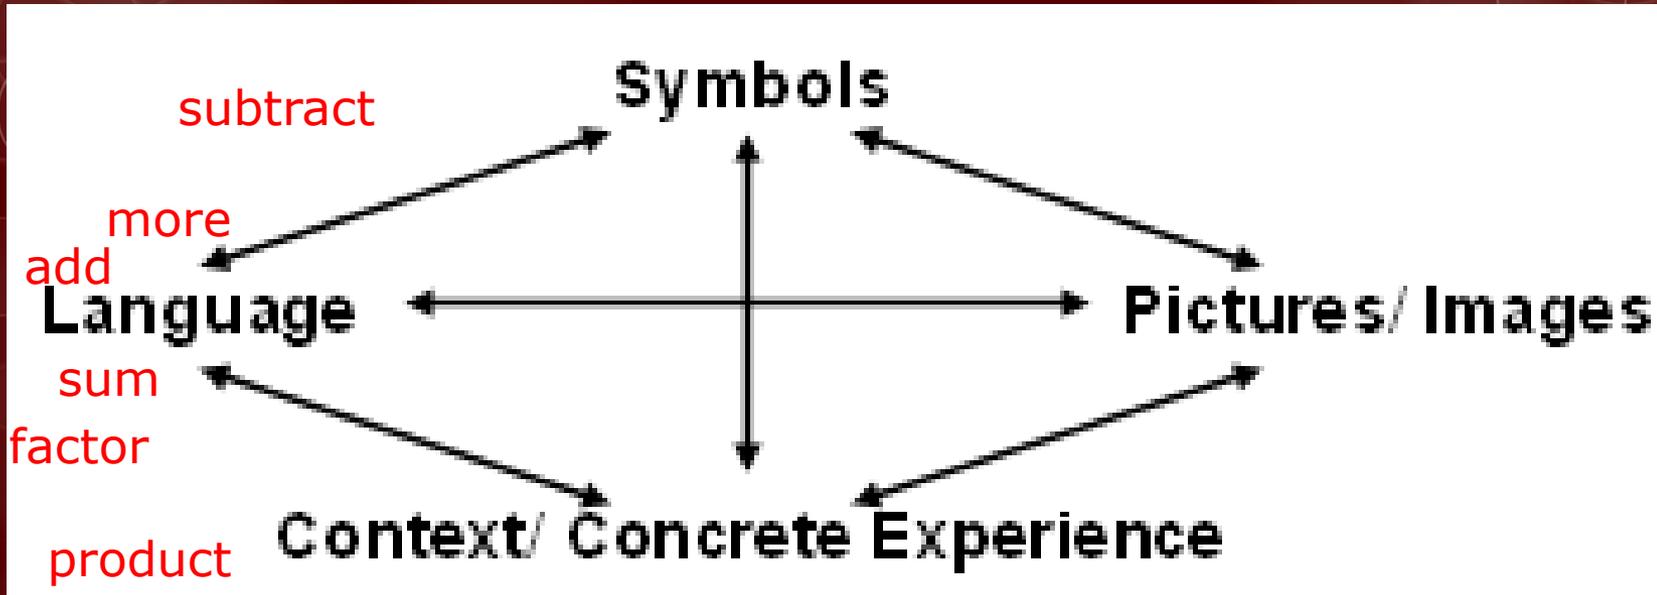

$$\begin{array}{r} 8 \cancel{9} 4 8 \\ - 263 \\ \hline 685 \end{array}$$

- Understanding place value will help children see the relationship between the columns.

How can I Help my child?

- Talk to your child about what they are doing in Maths.
- Ask them to explain and show you how to do.
- Always be positive! The Mastery curriculum believes that everyone can achieve in maths if they have an 'I can' attitude.
